360 ADMINISTRATION AND SYSTEMS

COMPANY PROFILE

www.pol360.co.za

At 360 Administration and Systems, we are experts in developing and managing sophisticated web-based member and policy administration systems tailored for the insurance industry. Our fully customizable policy administration system significantly enhances the accuracy and speed of data capture, uploading, and claims processing. Utilizing the open-source methodology, our administration software benefits both our developers and clients by employing the latest technology and ensuring continuous upgrades. This results in bespoke administration software with tailor-made functionality that caters to our clients' specific needs.

Understanding the intricate needs of insurance businesses, our comprehensive solutions encompass monthly collections, member registration, seamless communication tools, detailed growth analytics, and more. Our mission is to simplify your administrative challenges, allowing you to concentrate on the core facets of business growth and expansion. Entrust us to streamline your operations and witness your business thrive.

In addition to being user-friendly, our internet-based software eliminates license fees and cost per user, making it a cost-effective solution for businesses. Moreover, as a systems development company, we provide value-added call center services that assist clients with queries, validations, and essential administrative functions, offering a level of support akin to what one would expect from a larger administration company.
